E7-6 DISPENSER

You'll be assured maximum convenience and speed of application when you use the E7-6 Dispenser. This dispenser works perfectly with either roll or fan fold Tabulabels, and an experienced operator can apply these pressure sensitive, pin-feed labels to envelopes at speeds up to 1,500 per hour.

Note the way in which the dispensed label is positioned for extremely fast hand application. By placing a stack of envelopes directly under the front of the machine, only a minimum of move-

ment is required to affix each label to an envelope.

Each dispenser is equipped with a foot switch which makes possible either continuous or intermittent label dispensing. Dispensing speeds can be selected with the rheostat speed control. The E7-6 will handle label widths as small as 3/16th of an inch or as large as 6 inches (including backing paper). For example, our largest stock Tabulabel, a TAB 8015 (5" x 15/16"), can be dispensed with ease.

SPECIFICATIONS

Operating Speeds — 15 to 150 inches per min.
Rheostat control for variable speeds.

Capacity — 3/16" to 6" wide rolls

Net Wt. — 23½ lbs. **Shipping Wt.** — 30½ lbs.

Dimensions — 17½" x 9¾" x 6½"

Finish — Gray Wrinkle

Construction — cast aluminum — self-lubricating bearings

Signal Light — shows dispenser "on" or "off"

Toggle Switch — "on" or "off"

Motor — 60 cyc. 115 volts A.C. — 1.0 amp.

SA-6 SEMI-AUTOMATIC TABULABELER

Save time and cut mailing costs with an Avery semi-automatic labeling system. The SA-6 allows you to transfer existing addresses from punched cards or tape to self-adhesive Tabulabels with your present EDP printer... completely eliminating expensive address plates.

An unskilled operator easily can apply up to 35 address labels a minute to post cards, envelopes, and self-mailers. The machine speed automatically adjusts to the operator, and Tabulabels are applied as fast as the machine is fed.

The SA-6 accurately places labels on envelopes from

standard No. 10 to 9½" x 12½" in size, up to ¼" thick. It is an attractive, compact office machine that comes ready to plug in and operate. Continuous form labels feed directly from the box into the labeling head. An electronic microswitch controls the automatic dispensing of each label, positioned and ready for the next envelope.

Options: The SA-6 may be fitted with a special dispensing head that will accommodate Tabulabels to 8" wide and an elevation jack that will allow it to label objects to 8" thick.

SPECIFICATIONS:

Operating Speeds	Up to 2,000 per hour
Label Load Capacity	Continuous form, box of 5M labels
Approx. Weight	270 lbs.
Dimensions	Height 30", width 28", length 48"

Components	Electronic feeder, dispenser and impressor integrated into specially designed desk unit
Label Size	Up to 5" width
Power Requirements	110 volts, 60 cycle
